CALCIUM NITRATE 50%

Product Specification

Nitrate	= 8.60% aim, 8.30% min
pH	= 5.0 to 7.0 (@ 10% dilution)
Specific Gravity	= 1.480 +/- 0.02%
Calcium (Ca)	= 12.20% min 11.90%
Ammonium N	= 0.02% 0.05% max
Phosphorous	= 10 ppm 50 ppm max
Fluorine	= 50 ppm 50 ppm
Insolubles	= 10 ppm 50 ppm (water)
Description	clear to pale yellow solution
Packaging	200 Litre, 1,000 Litre IBC, Bulk

Description Calcium Nitrate 50% Solution is a concentrated source of Nitrate supplied in a versatile liquid form. It is completely soluble in water and is slightly viscous but is easily pumped.

Uses Odour control in waste water and industrial applications. Nitrogen source for fertilizers, additive to admixture industry. Liquid Calcium Nitrate 50% Solution is a highly concentrated source of Nitrate supplied as a ready to use liquid solution.
