## Potassium Hydroxide 48%

### Product Specification

KOH (total alkalinity)	= 48.0 to 50.0% w/w
Specific gravity 20C	= 1.49 approx
Sodium hydroxide	= 0.3% max
Potassium carbonate	= 0.25% max
Potassium chloride	= 0.005% max
Iron	= 0.0005% max
<b>Description</b>	<b>clear to amber solution</b>
<b>Packaging</b>	<b>15 Litre, 200 Litre, 1,000 Litre IBC</b>

**Description** Potassium hydroxide 48% solution is a clear to amber solution with no characteristic odour. It contains 48% (min) by weight of Potassium hydroxide. It is completely soluble in water and is slightly viscous but is easily pumped.

**Uses** Potassium hydroxide 48% solution is used as an effective pH adjuster in water treatment applications. Used as a catalyst in some industrial processes.

**Advantages** Potassium hydroxide 48% solution is ideal for treating waters with low pH that need pH adjustment.
